JOSHUA KELLOGG

FULL-STACK SOFTWARE DEVELOPER

(720) 441-8268 | KELLOGG.20.JOSHUA@GMAIL.COM

Software development has allowed me to satisfy my creativity and curiosity by applying my knowledge of a wide variety of systems and technologies in order to build solutions for real-world problems faced by real people. I am a developer from Denver, Colorado, and I would love to see what I can bring to your team!

Proficiencies

General Purpose Languages:

- Typescript
- Go
- Python

Domain-Specific Languages:

- HTML
- CSS
- SQL

Technologies:

- React
- Tailwind
- Bootstrap
- GraphQL
- REST APIs
- MySQL
- MongoDB

Education

University of Denver – Full-Stack Web Development Certification

Projects

API Integration, Menu Match
Built a system to ingest data from third-party REST APIs on the front end, integrated with native browser features to create a seamless user experience using a minimal, front-end focused stack.

REST API & MySQL Database, Dev Row Records
Managed MySQL database schema; constructed a robust REST API data layer using Express JS in order to effectively meet the needs of the front end user interface.

React User Interface Design & GraphQL integration, Snif
Brought new team up to speed on the use of Tailwind CSS in the design & development process, building a large part of the user interface as well as assisting in the creation of the GraphQL schema for the front end to consume.

Cobra CLI Tool Development, Dotstash
Built the application from scratch using the cobra CLI framework to create an effective and intuitive command-line interface. Ongoing development includes feature development, user experience improvements, and rapid integration in order to best meet user needs.

Work History

Barista, Target; Centennial, CO	March 2021 - January 2022
Sales Associate, Vans; Denver, CO	March 2022 - August 2023
Barista, Ink! Coffee; Denver, CO	August 2023 - Present
